

SBI Info No. 1

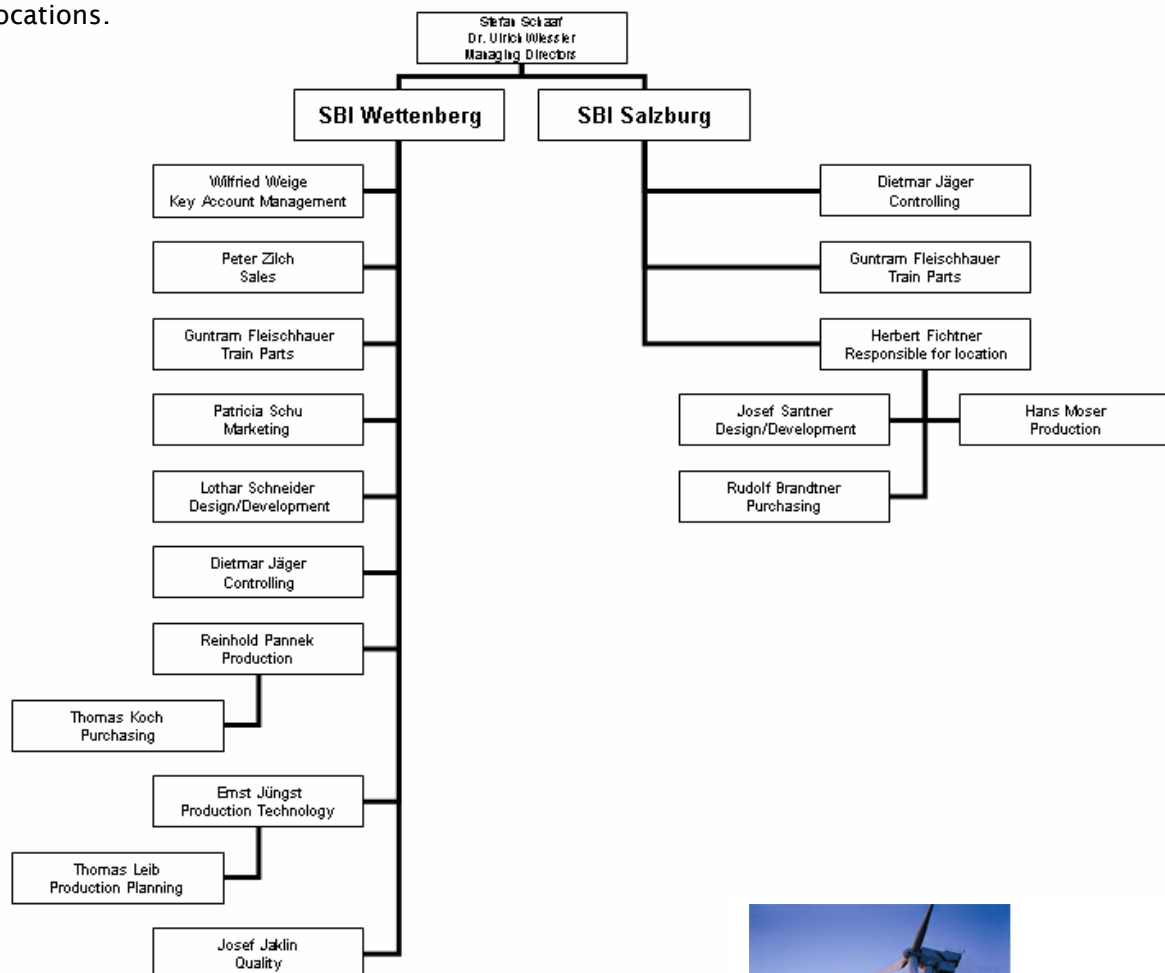

This first SBI info – and the subsequent ones – are intended to provide an overview of our activities. In addition we wish through them to make our enterprise more transparent for you as well as to inform you about internal and technical matters.

At the same time the SBI infos will indicate the opportunities world-wide for our products or, as the case may be, enable potential areas of business to be opened up together with you.

We shall be most pleased to receive inputs and feedback from your side so that all Schunk employees can participate in local highlights.

SBI has made a successful start in its first business year fortunately. The volume of projects in progress as well as new ones is requiring an increased amount of work at the present time at our Wettenberg location as well as in Salzburg. However we have to request your understanding today should bottlenecks come about in the short or medium term from time to time. Nevertheless we are doing our best to support the sales activities of the domestic and foreign companies and assure that we have taken corresponding steps for the future.

The very good order book situation permits us to view the future confidently at both SBI's locations.
